

THE PERFECT COMBINATION

INSTRUMENTATION VALVES

Brennan's line of check valves, ball valves, and screwed or integral bonnet needle valves can be supplied with either single or double ferrule fitting end connections.

We also offer manifold and double block and bleed valves which are compact, reduce leakage points, and are designed to last.

INSTRUMENTATION FITTINGS

The combination of Brennan's ASTM F 1387 certified fittings with the recommended instrumentation valves and tubing is the best way to eliminate expensive and hazardous leaks.

We supply a complete line of fully traceable single and double ferrule instrumentation fittings which are interchangeable and intermixable with other leading brands.
